Notes to the Condensed Interim Financial Statements

(Unaudited)

1. NATURE AND CONTINUANCE OF OPERATIONS

Geomega Resources Inc. (the “Company”) is incorporated under the Canada Business Corporations Act and is engaged in the acquisition, the exploration and evaluation of mining properties in Canada. The Company’s shares are listed on the TSX Venture Exchange under symbol GMA. The address of the Company’s registered office and principal place of business is 475 Victoria Avenue, Saint-Lambert, Quebec, Canada, J4P 2J1. These unaudited condensed interim financial statements were approved by the Company’s Board of Directors on April 8, 2013.

These condensed interim financial statements have been prepared on the basis of accounting principles applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to twelve months from the end of the reporting period.

Management is aware, in making its assessment, of material uncertainties related to events and conditions that may cast a significant doubt upon the Company’s ability to continue as a going concern as described in the following paragraph, and accordingly, the appropriateness of the use of accounting principles applicable to a going concern. These condensed interim financial statements do not reflect the adjustment to the carrying values of assets and liabilities, expenses and financial position classifications that would be necessary if the going concern assumption was not appropriate. These adjustments could be material.

Management estimates that the working capital will not be sufficient to meet the Company’s obligations and budgeted expenditures through February 28, 2014. Any funding shortfall may be met in the future in a number of ways including but not limited to, the issuance of new equity or debt financing. While management has been successful in securing financing in the past, there can be no assurance that it will be able to do so in the future or that these sources of funding or initiatives will be available to the Company or that they will be available on terms which are acceptable to the Company. If management is unable to obtain new funding, the Company may be unable to continue its operations, and amounts realized for assets might be less than amounts reflected in the financial statements.

2. SIGNIFICANT ACCOUNTING POLICIES

Statement of Compliance

These unaudited condensed interim financial statements have been prepared in accordance with the *International Financial Reporting Standards* (“IFRS”) as issued by the *International Accounting Standards Board* (“IASB”) applicable to the preparation of interim financial statements, including *International Accounting Standard* (“IAS”) 34, *Interim Financial Reporting*. Accordingly, these unaudited condensed interim financial statements do not include all of the information and footnotes required by International Financial Reporting Standards for complete financial statements for year end reporting purposes.

The condensed interim financial statements should be read in conjunction with the annual financial statements for the year ended May 31, 2012, which have been prepared in accordance with IFRS as issued by the IASB. 9. DEBT

On March 16, 2012, SIDEX, Limited Partnership ("SIDEX") granted a \$1,500,000 loan to the Company which bears interest at an annual rate of 8%. The loan is secured by the Company's tax credits receivable for the fiscal years ended in 2011 and 2012 related to mineral exploration from Revenu Quebec. The loan must be repaid on the earlier of December 31, 2013 or upon the receipt of the tax credits. On July 3, 2012, the Company reimbursed \$789,000 following the receipt of the 2011 tax credits for resources.

In connection with the loan, the Company issued 400,000, non-transferable common share purchase warrants entitling SIDEX to subscribe 400,000 common shares at a price of \$1.25 per share for a period of 12 months. On March 16, 2012, a fair value of \$53,073 was allocated to the warrants (see note 18).

Using discounted cash flows pricing models and an estimated 15% interest rate prevailing at the date of issuance for instruments with similar conditions and risk, the loan was evaluated at its fair value of the debt instrument, and the residual value was allocated to the warrants. The Company determined that the fair value of the debt instrument is \$705,837 as at February 28, 2013 (\$1,415,605 – May 31, 2012) and accrued interest of \$9,244 has been included in trade and other payables.

The Company incurred costs of \$34,000 in connection with the debt, of which \$32,980 has been allocated to the debt and \$1,020 to the warrants, based on their respective fair value.

The average fair value of the brokers' options of \$39,186 was estimated using the Black Scholes model and based on the following weighted average assumptions:

| Share price at date of grant | \$0.37 |
| Dividend yield | NIL |
| Expected volatility | 106% |
| Risk-free interest rate | 1.08% |

There was no exercise of brokers' options during the nine months ended February 28, 2013.

13. STOCK OPTIONS

The Company has established a stock option plan ("the Plan") whereby the Board of Directors (the "Board") may from time to time grant options to purchase common shares to employees, officers, directors and consultants, for such terms and at such exercise prices as may be determined by the Board in accordance with the terms of the plan.

The Plan provides that the maximum number of common shares in the capital of the Company that may be reserved for issuance under the Plan is limited to a maximum of 10% of the common shares outstanding and the maximum number of common shares which may be reserved for issuance to any one option may not exceed 5% of the common shares outstanding at the date of grant. These options may be exercised for a period of 5 years after the grant date and they vest gradually over a period of 24 months from the day of grant, at a rate of one-quarter per six-month period.

The stock option exercise price is established by the Board and may not be lower than the market price of the common shares at the time of grant.

On July 20, 2012, the Company granted to an officer a total of 100,000 stock options at an exercise price of \$0.45 expiring on July 20, 2017.

The calculation of basic loss per share is based on the loss for the period divided by the weighted average number of shares in circulation during the period. In calculating the diluted loss per share, potential common shares such as stock options, brokers' options and warrants have not been included as they would have the effect of decreasing the loss per share. Decreasing the loss per share would be antidilutive. Details of stock options, brokers' options and warrants issued that could potentially dilute earnings per share in the future are given in notes 11, 12 and 13.
